

1    **ABSTRACT OF THE DISCLOSURE**

2            A wheel assembly for a cart includes a wheel having an axle hole, a sleeve  
3    having a passage defined to communicate with the at least two cutouts in a distal end of  
4    the sleeve, an axle extending into the axle hole of the wheel and the passage of the sleeve,  
5    the axle having an annular groove to be exposed to the at least two cutouts of the sleeve  
6    after the axle is extended into the passage of the sleeve, and a clamp having two distal  
7    ends extending into the at least two cutouts to clamp a bottom face defining the annular  
8    groove.
